

HELP US TO HELP THE ENVIRONMENT

Reduce, Re-use & Recycle

Please use our recycling bags which can be found in your holiday home. Please recycle your general, glass and recycling waste at the various bin points shown on your arrival map. Please refrain from leaving bin bags on the veranda as this is a seaside resort and this attracts the seagulls.

Give the car a rest - walk, cycle or hop on the bus

If you fancy a change of scenery, why not give your car a rest and explore the coast or countryside on foot, bike or by using public transport.

Electric Charging Points

Have you travelled to Seafield in your EV? Electric charging points can be found in the Ocean Club car park. We politely request you do not charge from the caravan.

Respect Nature & the Local Community

Help us to look after our environment for future generations by guarding against fire, taking litter with you and using designated footpaths and cycle ways responsibly.

Stay Local, Eat Local & See Local

Supporting local businesses helps to keep Northumberland's unique character. Details of local markets can be found in your welcome pack and park reception.

Reduce our Carbon Footprint

With your help energy savings can be made – please turn off lights when they are not needed, keep windows closed when the heating is on and turn the heating off when going out.

Your hessian Seafield shopping bag is provided for use during your stay and once home. Reducing the use of plastic bags, carry it everywhere both on holiday and at home.

Please enjoy your holiday and with your help we promise to do all we can to look after our special environment for your next visit.
